-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13,18,19 and 44, drawn to a multistep process of making simvastatin, hereafter sim, classified in class 549, subclass 292.
- II. Claims 14-17,20 and 21, drawn to a multi-step process as above in which contains 2 extra steps in which the first involves dissolving sim in a water miscible solvent, classified in class 549, subclass 292.
- III. Claims 22-35, 40,41,42 and 45, drawn to a multi-step process as in Gp. I involving extra steps the first of which is dissolving sim in a solvent selected from a different group than in Gp. II, classified in class 549, subclass 292.
- IV. Claims 36-39 and 43, drawn to a multi-step process as in Gp. III wherein after step (e) sim is dissolved in a water miscible solvent followed by adding an anti-solvent to induce precipitation, classified in class 549, subclass 292.

The inventions are distinct, each from the other because of the following reasons:

The 4 above processes are different. Of course if Gp. I were found to be allowable over the art the other processes would also be allowable since they involve additional steps. However if the process of Gp. 1 were found to be anticipated the other processes could still be patentable. Thus additional search would have to be carried out. This is a crowded, very active art and the searches for all of the embodiments is burdensome. Thus because of the above and in the interests of effective patent examination restriction is required.

Art Unit: 1625

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernard Dentz whose telephone number is 571-272-0683. The examiner can normally be reached on Mon-Fri from 8 to 4:39.
